Wrocław, Poland | +48 664 583 272 | barinov.web@gmail.com
linkedin.com/in/dmytro-barinov-headpills

Professional Summary

Hands-on Webflow developer with commercial experience since 2020 and dozens of personally built live websites. Turn Figma files into production-quality responsive builds, plan CMS structures for future content and keep interactions reliable on mobile. Work directly with clients and designers.

Core Skills

Webflow: CMS collections, references and dynamic lists, reusable components, responsive builds, interactions, localization; Client-First, Lumos, Relume, Finsweet Attributes. Figma: Auto Layout, components, handoff review. Quality: on-page SEO, image optimisation, forms, migrations, DNS, SSL. HTML/CSS fundamentals; AI-assisted custom code with Claude Code and Codex.

Work Experience

Founder and Webflow Developer | HeadPills | 2022 - Present

Digital agency | headpills.com

- Personally build client websites in Webflow from Figma files: reusable components, responsive layouts, CMS and interactions; review designs for mobile issues before building.
- Maintain and extend live client sites with new pages, sections, fixes and migrations; use Claude Code and Codex for custom code, then test before handover.
- Work directly with clients in English on requirements, trade-offs and revisions; coordinate a 10-person team and typically five parallel agency projects in Notion.

Freelance Web Designer and Developer | 2020 - Present

- Personally deliver dozens of commercial websites from business discovery and UX/UI design through development, client revisions and launch.

Selected Project Highlights

Excursions Tenerife | excursionstenerife.es

Designed and built a complex Webflow CMS for tour variants, booking/payment integration and manager administration across four languages.

Bruit Brothers | bruitbrothers.com

Personally designed and built an expressive agency website demonstrating animation skills and custom interactions; sourced and edited hero footage.

MetalVent | metalvent.pl

Delivered a complete multi-page website in three weeks: adapted a template, created the name and logo, wrote content, built the CMS and handled client approvals and launch.
